

## BIG CATS

Donna H. Bowman, Author

Lions and most big cats are nocturnal, which means active during the night. Diurnal means active during the day; cheetahs are diurnal.

Are you nocturnal or diurnal?

***“Not only does this book provide an excellent introduction to the natural history of large cats but also presents a thought-provoking overview of big-cat conservation.”***

Christopher A. Shaw, M.S., Fossil Collection Manager,  
Natural History Museum of Los Angeles County & George C. Page Museum, La Brea Tar Pits (CA)
